

AI STUDYBUDDY

Phase 7 – AI Study Recommendations

This phase provides personalized study recommendations. The system can use learning activity and assessment results to suggest topics that need additional practice and recommend revision of previously studied materials. This makes the learning process more focused and organized.

Key Features

- Analyze Study Activity
- Identify Practice Areas
- Suggest Topics
- Recommend Revision
- Create Study Focus

PROCESS	Analyze Study Activity → Identify Practice Areas → Suggest Topics → Recommend Revision → Create Study Fo
---------	--

Project Connection: This phase continues the AI StudyBuddy project after Phases 1–4 and can be included as a separate module in the GitHub project documentation.
