

AI STUDYBUDDY

Phase 3 – AI-Powered Learning

The third phase is the main intelligent component of AI StudyBuddy. Google Generative AI is integrated into the application to provide learning assistance based on the user's study materials. The AI can help explain difficult concepts, summarize learning content, and answer questions related to the available study material. This makes the application more interactive than a normal document storage system. The goal of this phase is to provide students with simple and useful AI-based academic support.

Key Features

- Google Generative AI Integration
- Question Answering
- Topic Explanation
- Content Summarization
- Interactive Learning

PHASE FLOW
Google Generative AI Integration → Question Answering → Topic Explanation → Content Summarization → I

Purpose: To complete Phase 3 of the AI StudyBuddy system and support a simple, secure, and student-friendly learning workflow.
